

## THE KINGDOM OF GOD

Billion light years away from us there is the kingdom of God, the beginning of all beginnings, the one and the only one, the Almighty Creator of the whole Universe. Due to desire for self-awareness and self-realization he has divided himself into a countless pieces and sent them all around the world.

The universe has begun expanding with the unstoppable speed. At the moment when all the pieces will illuminate and incorporate into the God, then the process of expansion of the universe will stop and the reverse process will begin. It will not happen tomorrow, it will take over millions of years.

In the complete silence, profound love and perfect enlightenment, God has joined into the kingdom of God those who are most trusted and most loyal and follow God's will. They have proved themselves through the various trials. In the name of God they create harmony and love in the entire universe. Everything is done in order to bring us the experience of God's love and all dedicated to us, which we can sense through our souls.

God has created perfect system, based on love and mutual understanding. He created the records that are inviolable and speak about the whole creation of God. The lower Divine records speak

about the plan of souls and their mission in particular life. The Imperial records speak about humanity, our free will and all of our intentions. God gave us free will as a trial in a hope that we will always make the right choice between light and darkness deciding for the light, between correct and wrong choosing the correct. Other spiritual beings have not been given God's great gift of free will to make their own choice. Anyway, they have to go through the mission which must be done according to hierarchy range until successfully completed. Successful completion of the assignment is also a step forward for them selves and for those who participated in the trial.

Our planet plays an important role in the enlightenment of the soul. Our body grows up the soul and when successfully completing God's plan the soul progress in a hierarchy range, hence she approaches the God. The power and love of soul increases, hence, an importance of the next mission.

The dwelling of God is called the Centre of God. On his right hand side there is a Kingdom of Angels that transforms a male love of God on the left hand side there is a Devine Kingdom that transforms a female love of God. In the middle of God's Kingdom we have the rest of Gods, Goddesses, the Devine who have reached the perfection and balance of God, Great White Brotherhood (Sanat Kumara, Buddha, Maitreya, the Christ ...), Ascended Masters (Jesus, Mary, Jogananda ...). The Love of God is transformed either directly or through their spiritual hierarchy.

The Kingdom of Angels is sending us God's lessons through spiritual hierarchy. Many Angels have female energy and are converting marginal energy, thus they keep the balance and harmony of male energy of God. Those Angels who are closest to the God, Seraphim, Cherubim, Throne, are guarding the throne of God and his records. They regulate the functioning of entire Divine creation. Those who are closer to us as the authorities, Archangels and Angels, are transforming all of God's love into our souls, which is than transformed into our bodies. Hence, our soul gets associated with the God. Between those spheres in the spiritual Angels hierarchy we find Masteries, Imperium and power that join those spheres and establish an order and a balance of the Universe. The Devine Kingdom exists of Goddess, Devas, Villas, who are there to transform a female love and power of God into the areas where God wants its presence at that moment. Consequentially, they create an order and harmony.

Records of our lives are created at different levels, depending on the origin of our souls. The highest developed souls are having the records in the Diamond level, which is behind Causal level and consists of the records only. The highest angels follow records of our lives and compare them to the plan of our soul mission. They advice our spiritual guidance on how to support and guide us, and they help us to realize our mission as soon as possible. By completing the mission we create our soul's perfection and we open the door to serve God, which is the highest imaginable goal we can reach.
