

WATER STORES INFORMATION

Last week we published the test results of Sandi Dolinar's energy influence on water conducted by the Bion Institute. Now we are presenting Sandi's interpretation of some of the interesting results.

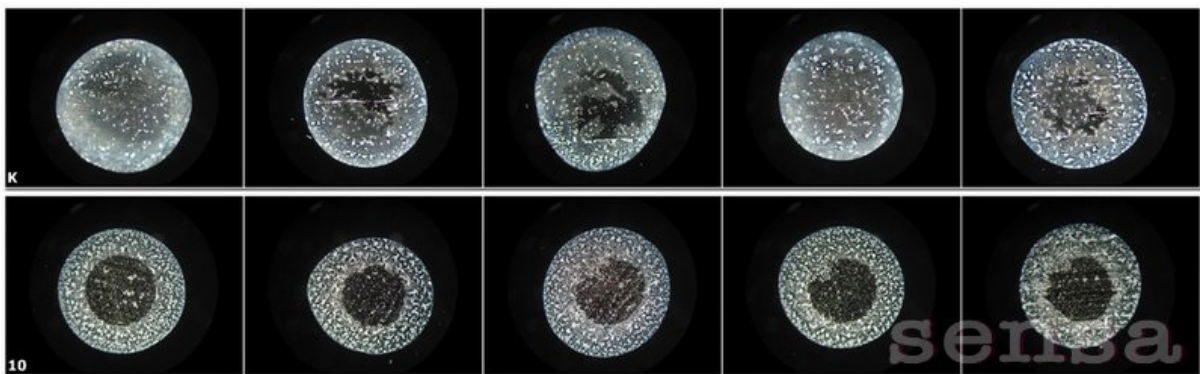

With his energy Sandi influenced ten water samples which had been determined prior to the testing. Here is what he says:

"I've put the energy of love into one sample and the energy of peace into another, I've imprinted some of them with information and others with records. A very interesting pattern formed in one of the drops of water, into which I had put an image of the Ascended Master Jesus, whose symbol is also the Lamb of God, and its approximation can be seen in the dried droplet in the picture."

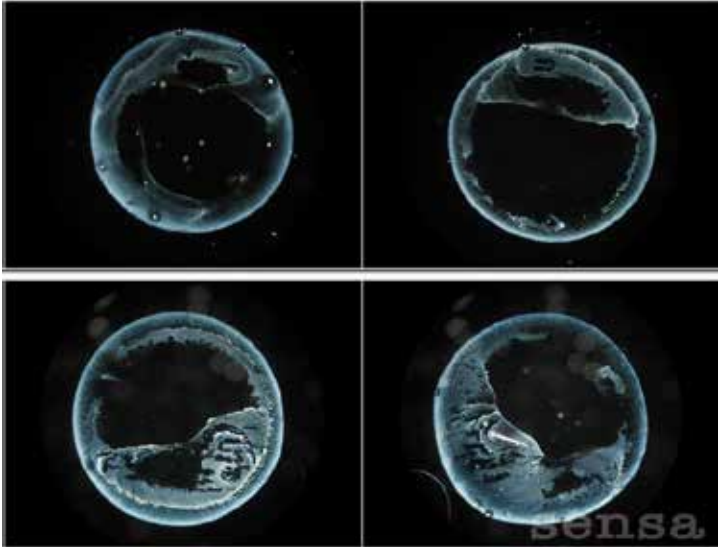

Picture 1: Residue of mineral water drops with a high content of dissolved particles. K – control, 2 – Sandi's imprint of the energy of the Ascended Master

Sandi: "One of the predetermined test patterns was also a record of an embryo. In the pictures below we see certain structures next to the ring which resemble an embryo in a womb."

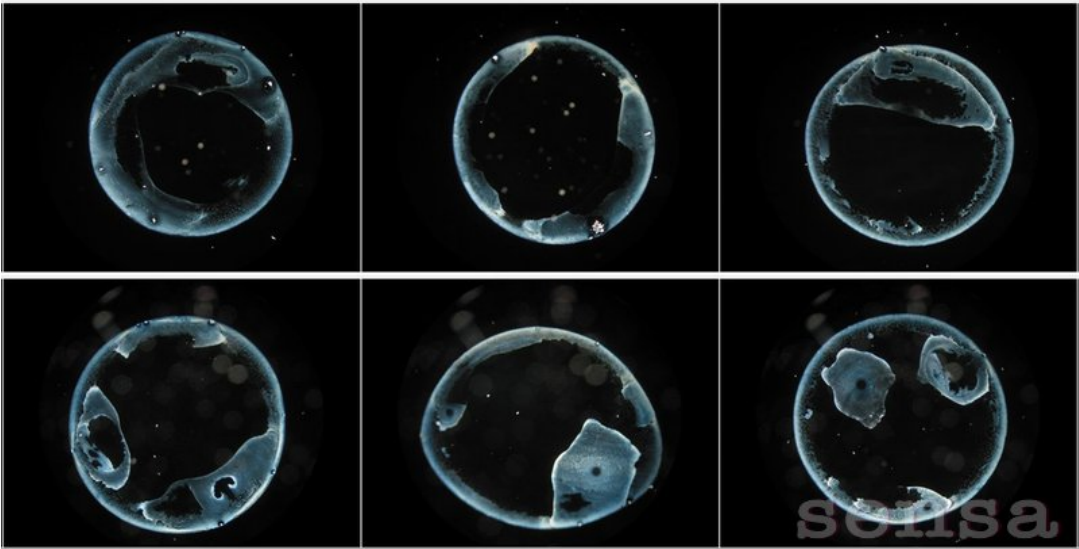

Picture 2: Residue of mineral water drops with a high content of dissolved particles. K – control, 2 – Sandi's imprint of the energy of an embryo

Very interesting results were produced when Sandi attempted to change the electromagnetic structure of water. The upper line shows evapo pictures of the control water sample, and the lower line shows the two patterns where Sandi tried to change the EM structure of water.

Picture 3: Residue of mineral water drops with a high content of dissolved particles. K – control, 2 – Sandi’s attempt to change the EM field

The below sample of making changes to the test spring water is also very interesting. The top picture is the control water sample, and the bottom picture shows Sandi’s effort to provide water with additional power.

Picture 4: Residue of spring water drops. Upper picture – control, lower picture – water under the influence of Sandi’s attempt to provide water with additional power
