

## HOW DO SPIRITUAL ENERGIES AFFECT US? PART 2

The Angelic Kingdom has its own hierarchy that works in different ways. **Seraphs** guard God's throne and **Cherubs** teach us about the secrets of life and give us God's power that we deserve.

**Thrones** in the connection with God's consciousness open doors for us, when we don't need to take care of ourselves anymore, but we can surrender to God's will inside of ourselves. **Dominions** give us shelter every single day and protect us on our way until we establish the perfect relationships.

**Authorities** give us strength and courage for everything we need to be able to open to God's will inside of ourselves. **Powers** direct us on the path of mind towards inner peace and give us strength and courage to look inside when that's necessary. **Principalities** help us reach inner contentment and calm us down in difficult moments. **Archangels** are our protectors and they direct us on the God's path, when we go astray resulting from our own fault, and when we don't turn inside when necessary. **Angels** protect us in our daily activities and bring us God's messages about how we have to change inside to find a way to inner love and peace.

Don't be scared of inner changes, as they are necessary to find the correct answer in the given moment. Don't be afraid of changes, which you don't perceive as necessary, because God's power is omnipresent in every moment of your lives. When you close the doors of

arrogance, God opens other doors for you, which you didn't even dream about. Arrogance separates you from your inner essence and closes the doors of your evolution, because when we care only for ourselves, we lose the blessing of good relationships with everybody, who tries to help us, when they perceive our inner struggle.

The correct path is the path of courage, which gives us the abundance of inner strength and opens the door of evolution wide open, so we can find in ourselves all the necessary to gain inner peace, which brings us to revelation of God's love in ourselves.

**Fear happens when we don't open to our inner strength and when we don't believe in ourselves and in our capability of removing all the obstacles that get on our way.**

**Gods** express God's will and offer us a support when we need them the most. They help us reach inner peace, harmony and inner strength by uniting us into a whole on the astral, mental and causal levels. This helps us find the path of richness, in which we accept ourselves internally. **Goddesses** protect us and guide us on the way, which is vital for us to accomplish changes that enrich us day by day, giving us the power and strength for surmounting daily difficulties. They personify God's power and give us that part of themselves, which helps us change inside.

**Deities** protect us and direct us towards the path, which opens all the doors of inner well-being and blissful relationships. They are a part of God's sense and give us all that is necessary for us to get on the right path. **Zeus** gives us inner strength for self-acceptance, self-knowing and feeling of blissfulness. **Aphrodite** shows us the way to beauty. **Hera** teaches us about love, patience and self-acceptance. **Aengus** teaches us about God's regiment of inner consciousness and acceptance. **Poseidon** gives us everything we need to discover our inner potentials.

**When we defeat our astral patterns, we open the door of the path, which upgrades our changes on the levels, where there is a need of wisdom to reach a certain goal. When we defeat our mental patterns, we open the door of an insight into the wider picture of our essence and the core of our existence.**

To be continued...
